15013711

Issued

Joint stock Company "GATE Insaat Taahhut Sanayi ve Ticaret "

The Republic of Turkey, Istanbul, Tekfen tower, Buyukdere Str. No. 209 4.
Levent/Sisli., BIN: 091241014942

(full name, location, business identification number of the legal entity (including a foreign legal entity), business

-identification number of the branch or representative office of a foreign legal entity in the absence of a business identification number of the legal entity or surname, name, patronymic (in case of), the individual identification number of a physical person)

To engage

Project activities

(name of the licensed activity in accordance with the
Law of the Republic of Kazakhstan "About permissions and notifications")

Special conditions

I category

(in accordance with article 36 of the Law of the Republic of Kazakhstan "About permissions and notifications")

Note

Inalienable, class 1

(alienability, class of permission)

Licensor

State institution "Management of state architectural-building control of Atyrau region". Akimat of Atyrau region.

(full name licensor)

Head (authorized person)

MUKHAMETKALIYULY KUANISH

(surname, name, patronymic (if any))

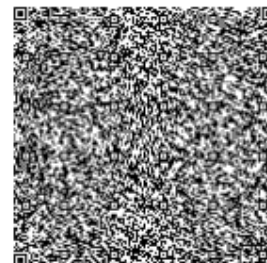

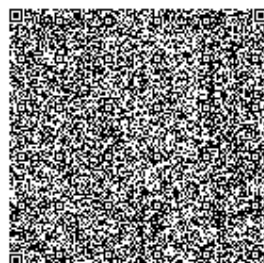

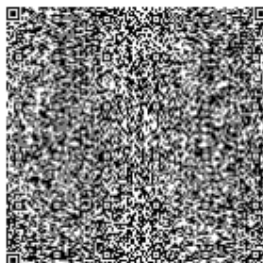

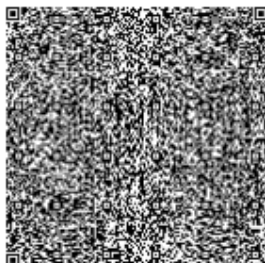

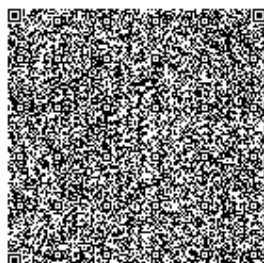

Date of initial issuance

23.07.2015

Term of the license

Place of issue

Atyrau city

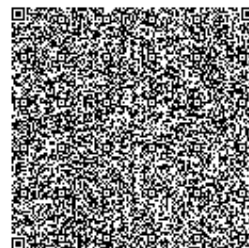

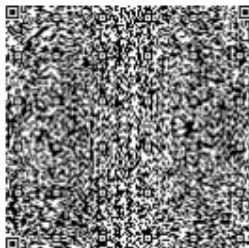

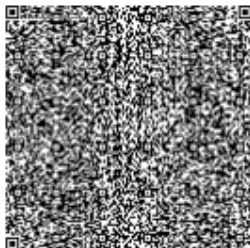

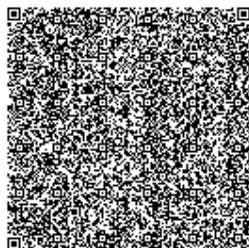

APPLICATION FOR STATE LICENSE

Number of license **15013711**

Date of license issue **23.07.2015 year**

The subtype(s) of the licensed activity:

- Technological design (development of the technological part of construction projects), industrial objects, including:
 - Dams and other waterworks
 - Tower designs and mast-type
 - For lifting and handling equipment and lifts
 - For medical, microbiological and pharmaceutical industries
 - For the energy industry
 - For the processing industry, including light and food industries
 - For heavy engineering
- Technological design (development of technological projects of construction) of buildings and buildings housing and civil purposes, including:
 - For transport infrastructure (intended for direct public service) and utilities (except for buildings and structures for servicing vehicles, as well as other industrial and household purposes)
 - For pre-school education, General and special education, boarding schools, institutions for training, research, cultural, educational and entertainment establishments, enterprises, trade (including pharmacy), health (treatment and disease prevention, rehabilitation and sanatorium treatment), catering and consumer services, fitness and sports, recreation and tourism, as well as other multi-functional buildings and complexes with premises various public purposes
- Technological design (development of the technological part of transportation construction projects), including:
 - The road network of urban electric transport
 - Bridges and bridge crossings, including overpasses, and multilevel transport interchanges
 - Routes of railway transport
 - Roads of all categories
- Technological design (development of the technological part of construction projects), infrastructure transport and communications, including service:
 - Nationwide and international lines of communications (including satellite) and other types of telecommunications
 - Local loop, radio, telecommunications

APPLICATION FOR STATE LICENSE

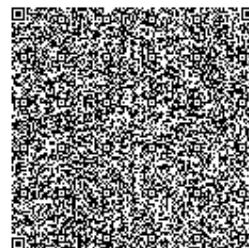

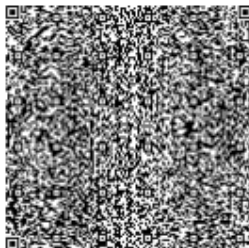

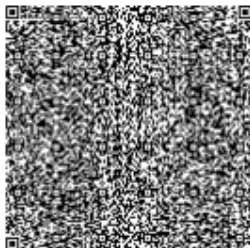

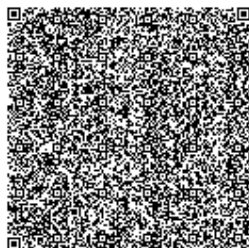

Number of license 15013711

Date of license issue 23.07.2015 year

The subtype(s) of the licensed activity:

- Technological design (development of the technological part of construction projects), infrastructure transport and communications, including service:

- Intra and external transportation, including automotive, electrical, rail and other rail, air, water transport
- Design of engineering systems and networks, including:
 - Systems of internal and external lighting, power up to 0.4 kV and 10 kV
 - Supply up to 35 kV to 110 kV and above
 - Oil pipelines, products pipelines, gas pipelines (gas medium and high pressure)
 - Internal heating (including electric), ventilation, air conditioning, refrigeration, gas (low pressure gas supply), as well as their external networks of support facilities
 - Internal water supply systems (hot and cold water) and sanitation, as well as their external networks of support facilities
 - Internal systems of low-voltage devices (telephones, fire alarm), as well as their external networks
- Urban design (with the right design for the urban rehabilitation of historic buildings, except for research and restoration works on monuments of history and culture) and planning, including development of:
 - Schemes of gas supply of settlements and industrial complexes located on the inter-settlement territories
 - Schemes of sewerage settlements and industrial complexes, including centralized system of collection and removal of domestic, industrial and storm water, placing the head of treatment facilities, evaporators and facilities for the regeneration effluent
 - Schemes of telecommunications and communications for the settlements with the placement of infrastructure and information sources
 - Schemes of electrical supply of settlements with the placement of production facilities and transportation of electric energy in the system development and electricity production complexes located on the inter-settlement territories
 - Schemes of transport infrastructure development of settlements (street-road network and facilities of intra and external transport, located within the boundaries of settlements) and inter-settlement territories (facilities and communications external transport, located outside of the road network of settlements)
 - Planning documentation (integrated circuits urban planning areas - regional planning projects, master plans for settlements, detailed projects

APPLICATION FOR STATE LICENSE

Number of license 15013711

Date of license issue 23.07.2015 year

The subtype(s) of the licensed activity:

- Urban design (with the right design for the urban rehabilitation of historic buildings, except for research and restoration works on monuments of history and culture) and planning, including development of:

- planning and project development areas, districts, neighborhoods, individual plots):
 - Water supply schemes of settlements with the placement of sources of drinking water and (or) the technical water and tracing the water lines and water supply schemes of industrial complexes located on the inter-settlement territories
 - Heating schemes of settlements with the placement of production facilities and transportation of thermal energy in the system development, as well as heat production complexes located on the inter-settlement territories
 - Technological design (development of technology projects), construction of agriculture, except processing enterprises
- Civil engineering design (with the right design for overhaul and (or) the reconstruction of buildings and structures, as well as strengthening of structures for each of the following works) and construction, including:
 - Metal (steel, aluminum and alloys) designs
 - Concrete and reinforced concrete, masonry and reinforced masonry structures
 - Bases and foundations
 - Architectural design for buildings and structures for the first or second and third levels of responsibility (with the right design for architectural restoration, except for research and restoration works on monuments of history and culture), including:
 - Facilities master plans, engineering training areas of improvement and relief organization

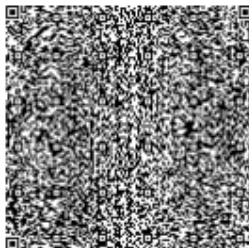

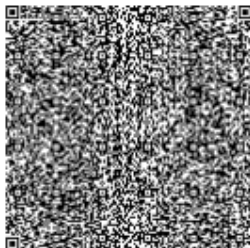

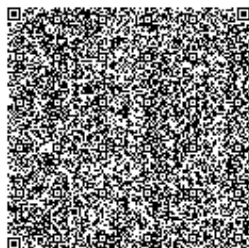

(name of the subspecies of the licensed activity in accordance with The law of the Republic of Kazakhstan "On the permits and notifications")
